

## **Personal Information:**

**Name:** Harsh Kumar

**Email:** Mr.harshkumar2808@gmail.com

**Phone Number:** 6386931879

### **Professional Summary:**

Harsh Kumar is a highly motivated and detail-oriented Bachelor of Computer Applications (BCA) graduate with a robust foundation in computer science principles and programming. His educational background and hands-on experience have equipped him with a diverse skill set, making him well-suited for a career in web development and related fields.

Harsh has gained proficiency in several programming languages, including Java, C++, and Python. These skills enable him to tackle various software development challenges, from creating efficient algorithms to building robust applications. His knowledge of web development principles and practices allows him to create dynamic and interactive websites that cater to user needs.

In addition to his technical skills, Harsh possesses a strong aptitude for problem-solving and analytical thinking. These abilities help him identify issues quickly and develop effective solutions. He is also adept at project management, demonstrating a keen ability to oversee and guide projects from inception to completion, ensuring that goals are met and deliverables are achieved.

Harsh's commitment to continuous learning and innovation is evident through his pursuit of the latest technologies and industry trends. He is passionate about exploring new tools and methodologies to enhance his skills and contribute to advancements in the tech industry. His excellent communication and collaborative mindset further support his ability to work effectively within teams and share ideas clearly with stakeholders.

## **Education:**

**Degree:** Bachelor of Computer Applications (BCA)

**Institution:** University of Lucknow

**Year of Completion:** 2024

The BCA program provided Harsh with a comprehensive education in computer science, covering various topics such as programming languages, web development, database management, and software engineering. This educational background has laid a strong foundation for his career in technology.

## **Career Goals:**

Harsh Kumar is actively seeking a position as a Web Developer. His goal is to apply his technical skills and knowledge in a professional setting, where he can contribute to designing and building effective web solutions. He aims to leverage his expertise to create user-friendly and engaging websites and applications.

## **Projects and Interests:**

### **Creating Text with Typing Effect:**

Harsh has a keen interest in creating dynamic text effects for web pages, where text smoothly appears and disappears. This interest reflects his enthusiasm for enhancing user experience through engaging and visually appealing design elements.

### **Tej Infrazone Website Coding:**

Harsh is seeking complete coding solutions (both frontend and backend) for the website Tej Infrazone. This indicates his involvement in or interest in developing and refining web projects, ensuring that all aspects of the website's functionality and design are well-executed.

## **Technologies and Skills:**

### **HTML (HyperText Markup Language):**

HTML forms the backbone of web development by providing the structural foundation for web pages. Harsh utilizes HTML to create and organize content, ensuring that it is displayed correctly across different browsers.

### **CSS (Cascading Style Sheets):**

CSS is used to style and layout HTML elements, allowing Harsh to control the visual presentation of web pages. His proficiency in CSS includes managing layout, colors, fonts, and spacing to create aesthetically pleasing designs.

### **Bootstrap:**

Bootstrap is a popular front-end framework that Harsh uses to build responsive and visually consistent web pages quickly. The framework provides pre-designed components and a responsive grid system, which speeds up the development process and enhances the user experience.

**PHP (Hypertext Preprocessor):**

PHP is a server-side scripting language that Harsh employs to create dynamic web applications. His knowledge of PHP allows him to handle server-side logic, interact with databases, and generate dynamic content based on user inputs.

**Database Management:**

Harsh has experience in managing databases, which involves designing schemas, performing backups, and ensuring data integrity. His skills in database management are crucial for building data-driven applications and maintaining efficient data storage.

**Web Development:**

Harsh is skilled in both frontend and backend web development. On the frontend, he designs and implements user interfaces that are interactive and user-friendly. On the backend, he develops server-side logic and integrates databases to support application functionality.

**Backend Development:**

In backend development, Harsh focuses on creating and managing the server-side components of web applications. This includes writing server-side code, handling requests, and ensuring smooth interaction between the frontend and the database.

**Key Attributes:**

**Detail-Oriented:** Pays close attention to details, ensuring high-quality work and minimizing errors.

**Analytical Thinker:** Able to analyze complex problems and develop effective solutions.

**Collaborative:** Works well with others, contributing to team projects and sharing ideas effectively.

**Passionate Learner:** Continuously seeks to learn and adapt to new technologies and industry trends.

Harsh Kumar's blend of technical expertise, problem-solving skills, and commitment to professional growth positions him as a valuable asset in the field of web development and software engineering.

Thank you ....
